

Internal Medicine
Cranbrook, British Columbia

Hospital and Private Office

Group of 3 internists seeking colleague to help provide call to East Kootenay Regional Hospital and to bring additional skill sets to the area. Current opportunities and needs include general internal medicine, respirology, nephrology and infectious disease skill sets for the acute setting but all sub-specialty skills can be discussed. Our cardiac lab provides EKG, stress tests, echocardiography and Holter monitoring services; the pulmonary lab provides Category 3 PFT service. Our new 6-Bed ICU will open in 2016 and is staffed by Internal Medicine. Local GPs & Hospitalists provide strong support so the role of Internist is mainly consultative. We are a very cohesive, and collegial team.

Cranbrook is the regional center for the East Kootenay with an airport that provides multiple flights to Vancouver and Calgary each day. As a family friendly and active mountain community, there are many opportunities in golfing, skiing, biking and the back country. Cranbrook is also home to the College of the Rockies. For more details on Cranbrook, see <http://cranbrook.ca/>.
